

Monthly Close & Reconciliation

Internal working file | supporting analysis | approval is evidenced separately

Close file field	Value
Organization	{{organization_name}}
Close period	{{close_period_end}}
Prepared by role	{{preparer_role}}
Reviewed by role	{{reviewer_role}}
File status	Working

Close control	Status	Evidence reference
Source population loaded	Not started	
Account mapping reviewed	Not started	
Reconciliation exceptions disposition	Not started	
Proposed entries balanced	Not started	
Controller review completed	Not started	

Source Data

Paste or generate authorized transaction-level rows. Do not place conclusions in this source-system layer.

[illegible]

Account Mapping

Map source codes to the reporting structure. Mapping fields are inputs, not inferred authority.

Account Code	Account Name	Statement Group	Reconciliation Owner Role	Active?

Reconciliation

Formula-driven comparison of source activity and ledger balance by mapped account.

[illegible]

Proposed Entries

Build entries only from resolved reconciliation differences and authorized adjustments.

Entry ID	Account Code	Description	Debit	Credit	Source Reference	Preparation Status	Review Note

Prior Period Comparison

Optional comparison layer; prior-period data is contextual and must not override current authority.

[illegible]

Exception Log

Record only workflow-supported exceptions. Questions do not supply their own resolution.

Exception ID	Detected In	Question / Condition	Authority Class	Owner Role	Due Date	Status	Resolution Reference

Control Checks

PASS indicates internal workbook checks only; it is not evidence of approval or release.

Check	Result	Delta / Count	Where to fix
Source debits equal source credits	PASS		0 Source_Data
Proposed debits equal proposed credits	PASS		0 Proposed_Entries
No reconciliation rows require review	PASS		0 Reconciliation
No open exceptions	PASS		0 Exceptions
Required close fields populated	FAIL		1 Close_Control
